

SANJAI S

+91 9361750128 | sanjaisivam.s@gmail.com | github.com/Sanjai8904 | Vilupuram, Tamil Nadu

PROFESSIONAL SUMMARY

Computer Science undergraduate (2026) with practical full-stack development experience across web and mobile platforms. Skilled in Python, Django, Java, Flutter, and RESTful API design. Demonstrated ability to build and deploy scalable, real-world applications. Seeking a Software Engineer or Technical role where I can contribute to reliable, user-centric software systems.

TECHNICAL SKILLS

Languages & Frameworks: Python, Java, SQL, Flutter, Firebase

Web Technologies: Django, REST APIs, WebSockets, HTML5, CSS3

Databases: PostgreSQL, MySQL, MongoDB

Engineering Practices: Data Structures & Algorithms, OOP, SDLC, Agile

Tools & Platforms: Git, Postman, Figma, Sketch

PROFESSIONAL EXPERIENCE

Software Engineering Intern — *Arnik Technologies*

July 2024 – August 2024

- Implemented data validation, user auth, and integrated 2 third-party services (Email/SMS + Geolocation APIs) across 5+ modules, reducing input errors by ~30% and manual processing by ~40%.
- Collaborated via **Git-based workflows** and Agile sprint planning, gaining hands-on experience with production-grade development practices.

PROJECT EXPERIENCE

FINDER – Community-Driven Lost Item Recovery App | *Full Stack Developer*

[\[GitHub Link\]](#)

Django, Flutter, Firebase, MySQL, Google Maps API

- Built a cross-platform mobile app** enabling users to report and recover lost items, serving as a real-world alternative to inefficient social media posts.
- Implemented **location-based search and categorical filtering** using Google Maps API, reducing average item search time by an estimated 50%.
- Engineered Django backend handling auth, data consistency, and ~200 test users with integrated Firebase real-time chat for ownership verification eliminating third-party messaging dependency.

Byte Cycle – Food Waste Reduction Platform | *Full Stack Developer*

[\[GitHub Link\]](#)

Django, Flutter, MongoDB, REST APIs, WebSockets

- Built a full-stack food waste management platform using Flutter, Django, MongoDB, and WebSockets, enabling real-time coordination between food donors and recipients; developed 8+ secure RESTful APIs for authentication, inventory management, and donation booking workflows.
- Integrated WebSockets for live inventory updates and notifications, improving coordination response time by ~60%; Structured backend services with modular architecture to support future scalability and load handling.

CODING PROFILES & ACHIEVEMENTS

- LeetCode:** Solved 130+ DSA problems covering arrays, strings, linked list, trees, SQL. [\[leetcode\]](#)
- Skillrack:** Solved 900+ problems; consistent top performer on college leaderboard. [\[skillrack\]](#)
- HackerRank:** Completed coding challenges in Python and Java.

EDUCATION

B.Tech – Computer Science and Business Systems

2022 – 2026

Rajalakshmi Institute of Technology (Chennai) | CGPA: 8.11 / 10.0

Class XII (HSC)

85.5%

Holy Angel Matric Higher Secondary School (Viluppuram)
